

Intermountain Conservation District Waterway Management Program Application Form

Please Print

Name of Applicant: _____

Applicant's Mailing Address: _____

Town: _____ Province: _____ Postal Code: _____

Phone: _____ Cell: _____ Email: _____

Name of Landowner (if different from applicant): _____

Legal Address of Project Site: _____ (Section/Township Range; Street; Lot/Plan)

Municipality in which Project is Located: _____

Project Information:

Name of Waterway (if known) _____

Assistance Required:

- _____ Brushing/cleanout of natural creek or waterway due to:
 - _____ Siltation
 - _____ Willows and/or other vegetation
 - _____ Other - please specify: _____

Diagram of Project Site

Show stream channel, proposed crossing site or area of stream requiring clean out and any other relevant features.

N

Details/comments

Please read all conditions and responsibilities listed on the reverse side of this application form. I hereby declare that I have read the conditions and that I agree to abide by the terms.

Signature of Applicant: _____ Date: _____

Signature of registered Landowner: _____ Date: _____
(if different than applicant)

Terms and Conditions

Brushing/Cleanout of Waterway:

- Program:** This program deals with the removal of silt, vegetation and / or other obstructions (**does not include beaver dams**), where it has been determined that these obstructions restrict the flow of water through the natural stream course.
- Objective:** To reestablish the natural capacity of existing creek systems through the removal of obstructions restricting ordinary flows in existing natural watercourses. The goal of this program is to prevent or control erosion and flooding of adjacent property which may occur as a result of overland flows arising from channel obstructions.
- Eligibility:** For the purposes of this program, a “natural” creek system is classified as one that is 2nd order or higher, and exists in its natural location with no improvements to increase its drainage capacity, rate of flow, or course.
- Assistance:** Funding for approved projects will be cost-shared in the ratio of 40% applicant and 60% Intermountain Conservation District. Applicant will be required to make a down payment of 50% of his estimated contribution prior to project being started.
- Note:** **This program is not an on-farm drainage improvement program, nor a means of constructing new drains, or diverting the natural watercourse.**

General Information

- All projects are to be approved by IMCD prior to construction and are subject to available funding.
- The Conservation District shall determine application priority in consultation with Sub-district, Board and staff.
- All necessary approvals will need to be in place prior to construction.
- Engineering and technical service for project design and construction will be subject to the availability of funding and / or staff. The Intermountain Conservation District reserves the right to establish priorities for providing such services and assistance.
- Other remedial actions, aside from, or in addition to clean-out, may include the construction of erosion controls, drop structures, and any necessary land treatment deemed necessary to alleviate the source of further on-site and/or downstream problems, and/or to facilitate maintenance.
- Landowner is responsible for all maintenance following completion of the project.
- IMCD reserves the right for reasonable access for inspection and to promote the program.
